Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 12-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent 10-289990.

With regard to claim 1, JP 10-289990 discloses forming an isolation region in a semiconductor substrate (see figure 3b); wherein a first oxide layer is on said substrate (see column 12, line 44); a first sacrificial layer is on said first oxide layer (see figure 3a), and a first nitride layer is on said first sacrificial layer (see figure 3a).

With regard to claim 2, JP 10-289990 discloses wherein a second sacrificial layer is between said first sacrificial layer and said first oxide layer (see figure 3a).

With regard to claim 12, JP 10-289990 discloses removing a first nitride layer and a first sacrificial layer (see figure 3d); wherein a first oxide layer is on a substrate (see 3a), said first sacrificial layer is on said first oxide layer (see figure 3a), and said first nitride layer is on said first sacrificial layer (see figure 3a).

Art Unit: 2812

With regard to claim 13, JP 10-289990 discloses wherein a second sacrificial layer is between said first sacrificial layer and said first oxide layer (see figure 3a).

Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Lee, U.S. Patent No. 5,994,201.

Lee discloses forming an isolation nitride on a substrate, the improvement comprising a first sacrificial layer between said isolation nitride and said substrate (see figure 1a and column 1, lines 45-52).

Allowable Subject Matter

Claims 2-11, 14-19 and 21-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose wherein said first sacrificial layer comprises silicon oxide, said second sacrificial layer comprises silicon nitride, said isolation region comprises an oxide, and said substrate comprises silicon; removing said second sacrificial layer, and wherein said first sacrificial layer comprises silicon oxide, said second sacrificial layer comprises silicon nitride, said isolation region comprises an oxide, and said substrate comprises silicon; and forming a second sacrificial layer between said first sacrificial layer and said substrate.

Art Unit: 2812

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Koido, et al., U.S. Patent No. 6,274,434; Omid-Zohoor et al., U.S. Patent No. 6,274,419; Wu et al., U.S. Patent No. 6,187,650; Duinkerken et al., U.S. Patent No. 5,661,091.
